RE: Master Metals, Inc., Site, Approval Notification of the Final Non Time Critical Completion Report

Dear Mr. Casey:

The U.S. Environmental Protection Agency (U.S. EPA) and the Ohio Environmental Protection Agency (Ohio EPA), (the "Agencies") have completed our review of the revised *Final Non Time Critical Completion Report* for the Master Metals Site, Cleveland, Ohio. Once ENTACT addresses the comments regarding the figures posed by Ohio EPA, in an earlier email, the Agencies will have no further comments, and considers the *Final Non Time Critical Completion Report* approved and in compliance with the Statement of Work and the Administrative Order on Consent.

If you have any questions or need additional information, please do not hesitate to ask. It has been a pleasure working with both you and ENTACT. Just so you'll know, ENTACT has set the standard for all of my other environmental projects.

I look forward to working with either you or ENTACT in the future, in the event that our paths should ever cross again.

Sincerely,

Gwendolyn S. Massenburg
